Ma’i ’u’u Study in French Polynesia Summary Statistics

DATA ACCESS AGREEMENT

These terms and conditions govern access to the managed access datasets (details of which are set out in Appendix I) to which the User Institution has requested access. The User Institution agrees to be bound by these terms and conditions.

1. Definitions

a. **Agreement**: This Data Access Agreement along with its appendices, and amendments from time to time.

b. **Applicable Law**: All laws, regulations, statutes, ordinances, and legally binding guidelines or codes of practice of any governmental, regulatory, or supervisory authority that are applicable to either Party or the subject matter of this Agreement, including but not limited to those relating to data protection, privacy, confidentiality, intellectual property, and the conduct of research, such as the General Data Protection Regulation (GDPR) (EU), and any other relevant national or international legislation.

c. **Authorised Personnel**: The individuals at the User Institution to whom the Committee grants access to the Data. This includes the User Institution, the individuals listed in Appendix II, and any other individuals for whom the User Institution subsequently requests access to the Data. Details of the initial Authorised Personnel are set out in Appendix II.

d. **Collaborators**: Entities or individuals which have contributed the Data.

e. **Committee**: The committee comprises the following members: Tristan Pascart (GHICL); Stephane Castel (Variant Bio); Sarah LeBaron von Baeyer (Variant Bio); Teanini Tematahotoa (French Polynesian Institute of Cancer). Membership of this Committee may change over time at the discretion of the Data Provider.

f. **Data**: The managed access datasets to which the User Institution has requested access.

g. **Data Provider**: Collectively, the Groupement des Hôpitaux de l'Institut Catholique de Lille (GHICL) and Variant Bio, Inc., who are responsible for the organization and oversight of the Data.

h. **External Collaborator**: A collaborator of the User Institution who has requested access to the Data.

i. **Project**: The project for which the User Institution has requested access to these Data. A description of the Project is set out in Appendix II.

j. **Publications**: Includes, without limitation, articles published in print journals, electronic journals, reviews, books, posters and other written and verbal presentations of research.

k. **Research Participant**: An individual whose information forms part of the Data.

l. **Research Purposes**: Shall mean research that is seeking to advance the understanding of genetics and genomics, including the treatment of disorders, and work on statistical methods that may be applied to such research.

m. **User Institution(s)**: The Institution that has requested access to the Data.

2. TERMS AND CONDITIONS

a. The User Institution agrees to use the Data only for the purpose of the Project (described in Appendix II) and only for Research Purposes, within the limitations (if any) set out in Appendix I.

b. The User Institution agrees to preserve, at all times, the confidentiality of the Data. In particular, it undertakes not to use, or attempt to use the Data to compromise or otherwise infringe the confidentiality of information on Research Participants. Without prejudice to the generality of the foregoing, the User Institution agrees to use the same measures that it would reasonably use to protect the confidentiality of its own proprietary information, and at least the measures set out in Appendix I to protect these Data.

c. The User Institution agrees to protect the confidentiality of Research Participants in any research papers or publications that they prepare by taking all reasonable care to limit the possibility of identification.

d. The User Institution agrees not to link or combine the Data to other information or archived data available in a way that could re-identify the Research Participants, even if access to that data has been formally granted to the User Institution or is freely available without restriction.

e. The User Institution agrees only to download, transfer, reproduce, or disclose the Data, in whole or part, to its Authorized Personnel. Should the User Institution wish to share the Data with an External Collaborator, the External Collaborator must complete a separate application for access to the Data.

f. The User Institution agrees that the Data Provider, the Collaborators, and all other parties involved in the creation, funding or protection of the Data: a) make no warranty or representation, express or implied as to the accuracy, quality or comprehensiveness of the Data; b) exclude to the fullest extent permitted by law all liability for actions, claims, proceedings, demands, losses (including but not limited to loss of profit), costs, awards damages and payments made by the User Institution that may arise (whether directly or indirectly) in any way whatsoever from the User Institution’s use of the Data or from the unavailability of, or break in access to, the Data for whatever reason and; c) bear no responsibility for the further analysis or interpretation of the Data.

g. The User Institution agrees to follow the Publication Policy in Appendix III.

h. The User Institution agrees not to make ownership claims on the Data and not to use or implement intellectual property protection in any manner that would prevent or block access to, or use of, any element of these Data, or conclusion drawn directly from these Data.

i. The User Institution agrees to use the Data only for internal, non-commercial research purposes and in a manner that is consistent with applicable law. “Internal, non-commercial research purposes” excludes (a) any activities, including clinical or research activities, sponsored or otherwise funded by, or performed for the benefit of or in collaboration with, or (b) granting any rights to, any for-profit or commercial entity or any of its affiliates.

j. The User Institution can elect to perform further research that would add intellectual and resource capital to the Data and decide to obtain intellectual property rights on these downstream discoveries. In this case, the User Institution agrees to implement licensing policies that will not obstruct further research and to follow the U.S. National Institutes of Health Best Practices for the Licensing of Genomic Inventions (2005) (https://www.federalregister.gov/documents/2004/11/19/04-25671/best-practices-for-the-licensing-of-genomic-inventions) in conformity with the Organisation for Economic Co-operation and Development Guidelines for the Licensing of the Genetic Inventions (2006) (https://www.oecd.org/en/publications/oecd-guidelines-for-the-licensing-of-genetic-inventions_9789264018273-en-fr.html).

k. The User Institution agrees to delete the Data held, once it is no longer used for the Project, unless obliged to retain the Data for archival purposes in conformity with audit or legal requirements.

l. The User Institution will notify the Committee within 30 calendar days of any changes or departures of Authorised Personnel.

m. The User Institution will notify the Committee prior to any significant changes to the protocol for the Project.

n. The User Institution will notify the Committee as soon as it becomes aware of a breach of the terms or conditions of this agreement, or as soon as the User Institution reasonably suspects unauthorized access, loss, damage or destruction to the Data has occurred.

o. The Data Provider may terminate this Agreement by written notice to the User Institution. If this agreement terminates for any reason, the User Institution will be required to delete any Data held, including copies and backup copies. This clause does not prevent the User Institution from retaining the Data for archival purpose in conformity with audit or legal requirements.

p. The User Institution accepts that it may be necessary for the Data Provider to amend the terms of this agreement from time to time. As an example, this may include specific provisions relating to the Data required by Collaborators or as may be required in accordance with Applicable Law. Any changes will be reduced to writing and undersigned by the authorised representatives of the Parties. Should the User Institution not accept the required amendments, the User Institution may terminate the Agreement and discontinue use of the Data in accordance with subclause (o) above.

q. If requested, the User Institution will provide the Data Provider with sufficient information and / or documentation as may be reasonably requested from time to time, to be inspected in order to verify that the User Institution is complying with the terms of this agreement.

r. The User Institution agrees to distribute a copy of these terms to the Authorised Personnel. The User Institution will procure that the Authorised Personnel comply with the terms of this agreement.

Agreed for User Institution

APPENDIX I – DATASET DETAILS

APPENDIX II —PROJECT DETAILS

APPENDIX III — PUBLICATION POLICY

APPENDIX I – DATASET DETAILS

Dataset reference: 10.5281/zenodo.22759036

DATA DESCRIPTION

Ma'i 'u'u Study in French Polynesia Summary Statistics

Genome-wide summary statistics from integrative analysis of whole genome sequencing with blood RNA-seq, blood metabolomic, and phenotypic data from the Ma'i 'u'u epidemiological study in French Polynesia.

The generation of the Data was overseen by the following principal investigators:
- Tristan Pascart: Professor, GHICL
- Stephane E. Castel: Co-founder, Chief Technology Officer, Variant Bio

Names of other Data producers/collaborators
- P. Keolu Fox, University of California, San Diego
- Tony Merriman, University of Otago
- Amélie Lansiaux, GHICL
- Jean-Jacques Vitagliano, GHICL
- Laurène Norberciak, GHICL
- Armand Elegbe, GHICL

SPECIFIC LIMITATIONS ON AREAS OF RESEARCH

The User Institution can replicate existing studies published by the Data Provider, using similar techniques, approaches and methods, to ensure that the published science is reproducible. The User Institution can carry out additional analyses of the data that are related to gout or comorbidities, including metabolic and kidney diseases.

LIMITATIONS RELEVANT TO STUDY

Full summary statistics are available to qualified researchers for non-commercial use only. Evidence of specific ethical approval (e.g., Institutional Review Board (IRB) approval) will be necessary for access to be granted.

The User Institution cannot undertake studies of a medical nature without first seeking the approval of the Committee.

A moratorium on publication until a given date may be a condition of Data access and use, primarily in cases where a study proposed by the User Institution overlaps in part or in whole with ongoing studies by the Data Provider.

Minimum protection measures required

The User Institution will implement appropriate technical and organizational measures designed to ensure a level of security appropriate to the risk, including as appropriate:

- All Data is encrypted both in transit and at rest.
- Data can only be accessed by authorized endpoints operating within the User Institution's network.
- Access is controlled using the principle of least privilege, which provides no more access to Data than required for researchers to carry out their job responsibilities.
- The User Institution keeps extensive logs that are monitored for unauthorized access.
- Scans of the User Institution's computational and network resources are regularly performed to identify potential threats and vulnerabilities. All potential threats are logged, and any 'critical' vulnerabilities are remediated in a timely manner.

APPENDIX II – PROJECT DETAILS
(to be completed by the User Institution)

Details of Data requested

Brief abstract of the Project in which the Data will be used (500 words max)

All individuals who the User Institution wishes to be named as registered users

Name of registered user:

Job Title:
Supervisor*:

APPENDIX III – PUBLICATION POLICY

The Data Provider may publish the results of their analysis of this dataset and do not consider its deposition into public databases to be the equivalent of such publications. The Data Provider anticipates that the dataset could be useful to other qualified researchers for a variety of purposes. However, some areas of work are subject to a publication moratorium.

The publication moratorium applies to research on topics that the Data Provider is currently pursuing. If the User Institution's proposed research falls within these areas, the User Institution will be notified during the application process. In such cases, submission for publication should not occur until the Committee has provided written consent for publication on or after a given date, either in a separate written document, or more commonly, as part of this Agreement. For all other research topics, no such approval is required.

In any publications based on these Data, please cite the publications listed below, include the dataset reference identifier, and acknowledge its use in a form agreed by the User Institution with the Committee.

1. Pascart, T. *et al*. The gout epidemic in French Polynesia: a modelling study of data from the Ma'i u'u epidemiological survey. *Lancet Global Health* (2024).
2. Pascart, T. *et al*. Genetic and Multi-Omic Insights into Inflammation and Metabolism in a French Polynesian Cohort. *Nature Communications* (2026).
